

Are there any cigarettes I can buy for 3 * * yen ?

For a regular smoker... to take a break, to catch their breath, to change their mood

For me... as a reward * times a month

I can't afford to be leisurely about taking breaks

① Are there any cigarettes I can buy for 3** yen?

② Do you have the cheapest cigarettes?

However, if the cigarettes I buy for the above reasons are paper cigarettes,

I have already purchased plastic filters from Daiso, so I put those on before smoking.

Because... the plastic filter is transparent, and just one puff of a cigarette causes the reddish-brown substance of tar or nicotine to adhere to the inside of that transparent plastic filter.

This is what is meant by

"all harm and no benefit"

Incidentally, on a different note, in my case, on YouTube,

*** "Meshi no Tane"**

*** "Cancer Information Channel"**

always appear by default.

That person's browsing history ➡ Videos from their browsing history genre always appear.

And if you look at Hiro-kun's website, you can find out everything for free and do it yourself

➡ That's how it's going to be.
