

Back when I wore men's suits

Habit of sneezing while talking

When I was still working for a company, I was walking around Shimbashi Station
(near the steam locomotive train station),
a famous business district in Tokyo, in a regular men's suit, on a labor union-related visit,
when I heard a salaryman's voice from somewhere say,
"It's worse than Shinjuku ?-chome."
I kind of understood the general meaning,
but to be more specific...
"Shinjuku ?-chome" reminded me of a certain cross-dressing entertainer.
That area is famous for that, isn't it...?

I've never been there, so I haven't actually seen what it's like,
But When it comes to men in drag... it's the complete opposite...
Is that why they considered it a bad idea?
Even now, I still don't really understand.
However, even when I wear a regular tight skirt or a slightly short skirt, no one around me
seems to notice anything strange.
When I was attending Shiseido Academy wearing a slightly short knit skirt,
I could see a young man on the train home who deliberately crouched down on the opposite
platform and peered up from below... but I didn't feel anything in particular...
However, women also wear slacks, and it's a very common sight in the fashion model industry.

By the way,
The arduous packing work ➡ is now awaiting payment.
